
A
Looming: giant fibre
left GF lost: 66 of 66 below 100 Hz
left GF kept: 1 of 254 below 100 Hz
below 100 Hz: 67 flies, 22 silent
Giant fibre rate (Hz)
Severity s
B
Sugar: MN9
silent: 66 flies, 61 of them
lacking ≥1 MN9 neuron
one MN9 lost, still active: 35 of 89
MN9 feeding drive (Hz)
Severity s
C
Giant fibre < 100 Hz
MN9 silent (0 Hz)
Flies (of 32)
Severity s
D
Severity 0 to 0.3
Severity s
high-activity flies
healthy
maxima
MBON rate (Hz)
Kenyon cell rate (Hz)
E
Severity 0.5
flies above the healthy maximum:
0/64 20/32 0/32 9/32 0/32
Kenyon cell rate (Hz)
Healthy
Threshold shift only
Synapse loss only
Neuron loss only
All three
F
KC and MBON rate both above the healthy maximum
KC and MBON rate both > 1.5 × the median of the fly's own severity group
High-activity flies (of 32)
Severity s
